### **About the Event**

Central Teacher Eligibility Test (CTET) is the most sought exam and the only gateway for getting a teaching job in the schools at the junior and elementary level. Qualifying the exam is the minimum eligibility requirement defined for teachers who are working at any government, public or private school. To crack the exam, candidates must have a proper strategic plan based on their abilities. A good preparation plan provides a defined path to the candidates.

Prof. Nasrin suggested that Child Development and Pedagogy is compulsory for all students and it should be a focal point in preparation. Sound knowledge of this subject is essential as score in this paper provides an edge to clear exam.

Candidates can easily figure out their weakness and strengths based on the subjects, topics and subtopics. Time management is the key to success. Students were advised to consult subject books to get in depth understanding of all concepts.

The students participated with interest and commitment.
